“Go / Fight Club”

Hello
No, no it's ok
Don't be afraid
Haven't seen you around here lately
What do you wanna know
Don't be afraid
It's just what you need

You're right
Behind
Am I thinking it out loud
All by myself
(I never know if I'm good)

I wait
(For moments)
Debate
(and minutes)
And refrain
(and hours)
Let you say the words you say
Til I break away
(Until the day)

**(You're like the blue)
I feel alive inside it
Feel like driving somewhere, someplace
(And the oranges and the green)
I wanna run to my fears til I'm not afraid
(And the turquoise in my mind)**

**My heart
Can confide
In itself
No I don't need no one else
(You can't tell me nothing)
To show me the way
(Like a jaguar in the wild)**

**I wait
(For months)
Debate
(And years)
What it takes
(For decades)
For the words to be uncaged
I wanna mean what I say
(Wanna mean what I say)**

**I feel alive inside it
I feel like driving somewhere, someplace
(Til the pavement meets the sky)
I wanna run to my fears til I'm not afraid
(Catch a current of fresh air to ride)**

**I feel alive inside it
I feel like driving somewhere, someplace
(Til the pavement meets the sky)
I wanna run to my fears til I'm not afraid
(Catch a current of fresh air to ride)**

**I feel alive inside it
I feel like driving somewhere, someplace
(Til the pavement meets the sky)
I wanna run to my fears til I'm not afraid**
