“What my world spins around”

[Verse 1]

I love a first cast when the water's glass and the line starts to run
Or that first sip of a cold beer when the working week's done
I love the twilight in the morning 'fore the day wakes up
With the windows down on the first ride in a paid-up truck
And I love a slow down in a beach town with an ocean view
And I love a first fall Saturday trip down to Baton Rouge
And I love a six-string with the stars out and the campfire glow
But girl, that don't even come close

[Chorus]

To the way that it feels when you lean in and kiss me
The way that you dance when you get kinda tipsy
I'm wrapped 'round your finger like this ring I'm wearin'
That look in your eye, girl, when you catch me starin'
And I don't even know what it is, but now that I found it
I can't imagine me livin' without this
Back forty view on our piece of ground
Watching you watch the sun going down
That's what my world spins around

[Verse 2]

Well, I finally get it now, when they say you know, you know

And yeah, girl, you had me from that first hello
And the only thing better is Heaven above
But until I get there, I'll never get enough of

[Chorus]

The way that it feels when you lean in and kiss me
The way that you dance when you get kinda tipsy
I'm wrapped 'round your finger like this ring I'm wearin'
That look in your eye, girl, when you catch me starin', and
I don't even know what it is, but now that I found it
I can't imagine me livin' without this
Back forty view on our piece of ground
Watching you watch the sun going down
That's what my world spins around

[Post-Chorus]

What my world spins around
Oh, yeah

[Chorus]

The way that it feels when you lean in and kiss me
The way that you dance when you get kinda tipsy
And I'm wrapped 'round your finger like this ring I'm wearin'
And that look in your eye, girl, when you catch me starin', and
I don't even know what it is, but now that I found it
I can't imagine me livin' without this
Back forty view on our piece of ground
Watching you watch the sun goin' down
That's what my world spins around

[Outro]

You're what my world spins around
What my world spins around
