## "Foot Prints"

### [Intro]

Talk to me  
Ayy, I talk back  
BlockWorks

### [Verse 1]

Ain't a nigga in my city that don't know me for trapping  
Ask that nigga, "Did he have a Benz before he was rapping?"  
I remember pushin' yams, selling dope in the Saturn  
Before I ever took an advance the Rollie was platinum  
Shook hands with some niggas that don't know me from Adam  
Took it and ran, next one on me fam, I owe you for that one  
Bust-down Cubano bracelet on the wrist that I cooked with  
To remind me of them grits and them zips and that good sip  
Caught a fish and I hooked it, all the risks when we took trips  
Niggas stepped on the work so good left a footprint

### [Chorus]

Footprints in the sand, my Jesus walk with me  
Yeah, it's ConCreatures the fam, you know we all city (Ayy)  
Talk to me, I talk back, now let's talk about it (Uh-huh)  
I turn your block to a blackboard and put some chalk around it  
Where we at?

**[Verse 2]**

Slide in Bentley 'round the city on skinnies with shivs  
Out of town with them plates getting fifty a clip  
Niggas living on oasis to get hit with a Sig  
Three bodies on the striggy, can't get jiggy with this  
Whole thing, half nine-piece, split or a bean  
I've been doing this since back when Mel Gibson was Riggs  
Lift the wick on that Roman candle, stick as big a twig  
Fell asleep in the bando, I used to live in the Spig  
Broke dance the whole satchel got some blow to hit harder than shrapnel  
In front of you claim, if you ain't gang, I'ma tax you  
Used to play in Saint Matthew versus Melvin [?]  
Read a text from my brother Wayne, "That nigga Delvin, he dead"  
Put my hands on my head, sent a prayer for my mans  
Told him when God send my flight, just to be there when I land  
It's still ConCreatures

**[Chorus]**

Footprints in the sand, my Jesus walk with me  
Yeah, it's ConCreatures the fam, you know we all city (Ayy)  
Talk to me, I talk back, now let's talk about it (Uh-huh)  
I turn your block to a blackboard and put some chalk around it  
Where we at? Let's get it
