## "Ghost In The Machine"

Everything disgusting, conversation is so boring  
Heard about what?  
"I hate her," "I don't agree," "I did it first"  
I give a fuck  
I just wanna fuck, eat, sleep, love happy  
Can you make me happy? Can you keep me happy?

Can you distract me from all the disaster?  
Can you touch on me and not call me after?  
Can you hate on me and mask it with laughter?  
Can you lead me to the ark? What's the password?

I need humanity  
Y'all lack humanity, drowning in vanity  
Craving humanity  
Y'all lack humanity, I need humanity  
I need—

Everybody wanna be beautiful, scared of the unusual  
Scared of givin' mutual respect, all that you hate  
You reflect all that godlike, you forget how to love somebody  
I hate everybody, I hate everyone  
Let's talk about A.I., robot got more heart than I

Robot got future, I don't  
Robot get sleep, but I don't power down  
I'm wide open, I'm awake, I'm on autopilot  
I'm out of my mind and I'm wide open

Can you distract me from all the disaster?  
Can you touch on me and not call me after?  
Can you hate on me and mask it with laughter?  
Can you lead me to the ark? What's the password?

I need humanity  
Y'all lack humanity, drowning in vanity  
Craving humanity  
Y'all lack humanity, I need humanity  
I need

You said all of my friends are on my payroll  
You're not wrong, you're an asshole  
Screaming at you in the Ludlow  
I was yours for free  
I don't get existential  
I just think about myself and look where that got me  
Standin' on my own in an airport bar or hotel lobby  
Waiting to feel clean  
That's so fucking boring

Can you distract me from all the disaster?  
Can you touch on me and not call me after?  
Can you hate on me and mask it with laughter?  
Can you lead me to the ark? What's the password?

I need humanity  
Y'all lack humanity, drowning in vanity

Craving humanity  
Y'all lack humanity, I need humanity  
I need—

Those who have forsaken their humanity  
They like to patch their life with morality  
I think I might be tryna patch my life with morality  
I'm curious, I'm curious
