"2step"

I had a bad week

Spent the evenin' pretendin' it wasn't that deep

You could see in my eyes that it was takin' over

I guess I was just blind, and caught up in the moment

You know you take all of my stress right down

Help me get it off my chest and out

Into the ether with the rest of this mess

That just keeps us depressed

We forget that we're here right now

'Cause we're livin' life at a different pace, stuck in a constant race

Keep the pressure on, you're bound to break

Something's got to change

We should just be cancellin' all our plans, and not give a damn

If we're missin' out on what the people think is right

Seein' through a picture behind the screen, and forget to be
Lose the conversation for the message that you'll never read

I think maybe you and me

Oh, we should head out to the place where the music plays

And then

We'll go all night

Two-steppin' with the woman I love

All my troubles turn to nothin' when I'm in your eyes, electrified

We'll keep turnin' up and go all night

Oh, we had dips and falls in our time

But we know what it feels to be low then up, alone then loved

And all we need is us to go all

Night, night

Two-steppin' with the woman I love

Night, yeah

All we need is us

What do you reckon, is it just me?

Words are weapons and occasionally they cut deep

Crisis of confidence, it tends to come
When I feel the dark and I open my heart
If you don't see it, you should trust me

I feel like I've got nothin' left right now
Except this beauty in her dress right now
She got me feelin' like the best, and the rest are just less than she needs
So we press play, and step to the beat

'Cause we're livin' life at a different pace, stuck in a constant race
Keep the pressure on, you're bound to break
Something's got to change
We should just be cancellin' all our plans and not give a damn
Head out to the place where it plays and

We'll go all night
Two-steppin' with the woman I love
All my troubles turn to nothin' when I'm in your eyes, electrified
We'll keep turnin' up, and go all night
Oh, we had dips and falls in our time
But we know what it feels to be low then up, alone then loved
And all we need is us to go all

Night, night

Two-steppin' with the woman I love

Night, yeah

All we need is us to go all night

Night, night

Two-steppin' with the woman I love

Night, yeah

All we need is us to go all night
