## "End of the World"

I know the end is near, the television telling lies  
I know for sure the revolution won't be televised  
I know that we been waiting patiently for better times  
We fell asleep, and men are blind, can't recognize it's genocide  
Feel like the bomb about to drop outta the clouds  
Another virus going airborne, go hide inside your house  
Farmers watching crops die, they're drying up with droughts  
Angry people forming crowds and tryna burn the cities down  
This is Armageddon, martial law for our protection  
I talked to God, but it's long distance, and I lost reception  
Forest fires and oil spills are the awful lessons  
I'm just waiting for the Devil to take over Heaven  
This is biblical, I swear it's in the Bible  
We keep killing one another, and we're dying for survival

We used to fight for peace, we put our flowers in their rifles  
Now we're 'bout to be extinct, every man, woman and child

If it's the end of the world, I will do better next time

Oh yeah, I know it, yeah, I know it

If it's the end of the world I know that I have lived my life

To the fullest, yeah, the fullest

We stood on top of mountains, we've been to space before

We had our dogs and houses, we dug up dinosaurs

We built those bombs they're dropping, we fought in all their wars

Now that the sky is falling, what did we do it for?

Feels like the end is near, our freedom's disappearing, ah

People playing God, call it genetic engineering, ah

Media misleading us, and evil's interfering

While the government we need became the power that we're fearing

Our billionaires are going to space, don't blame 'em for leaving

Birds are falling out the air, fish washing up on our beaches

This is end times, humans got a deadline

Children were the future 'til we ruined 'em with headlines

Should be past they bedtime, but everyone's woke

They told us, "Chase a dollar", then made everyone broke  
I feel like cryptocurrency is probably our last financial hope  
Soon enough the government will leave your bank account froze  
Judgment Day is coming, you can run, or you can stand and fight  
Panic in the dark or lead rebellions by the candlelight  
This ain't your granddaddy's Planet Earth, it's black and white  
The end is coming, I'll see y'all in the afterlife

If it's the end of the world, I will do better next time

Oh yeah, I know it, yeah, I know it

If it's the end of the world I know that I have lived my life

To the fullest, yeah, the fullest

We stood on top of mountains, we've been to space before

We had our dogs and houses, we dug up dinosaurs

We built those bombs they're dropping, we fought in all their wars

Now that the sky is falling, what did we do it for?

It's the end of the world as we know it

It's our fault that it's over

While we look down at our phones, they'll drop a bomb from a drone

Then an explosion, we should've known it

We stood on top of mountains, we've been to space before  
We had our dogs and houses, we dug up dinosaurs  
We built those bombs they're dropping, we fought in all their wars  
Now that the sky is falling, what did we do it for?
