"Enemy"

We doin' good

We doin' good

That's your problem

Pulling me down like an anchor

Sayin' it's my fault, you're angered

Telling me no one will love me (watch your mouth)

Telling me I'm gon' be lonely

(Watch me, watch me, watch me, watch me now)

You and me on for a good run

Thinking that you were a good one

Under your palm, yeah, you like that (what the f-?)

Now it's my turn to bite back (I've had enough)

Ooh, did it to yourself (yourself)

Playing with my mind (my mind)

Putting me through hell (hell)

Ooh, I'll be broken too (too)

If you left me like (me like) like I left you

That's your problem

Not my problem, not my problem

Call it what you want, but you're not my problem

Cryin' all the time, but you're not my problem

If you got issues (that's your problem)

Not my problem, not my problem

Call it what you want, but you're not my problem

Cryin' all the time, but you're not my problem

If you got issues (that's your problem)

Doin' it all for reaction

Doing the most in your caption

Making me seem like the bad guy (watch your mouth)

Try to bring me down, but nice try

(Watch me, watch me, watch me, watch me now)

I used to like you
How did I like you? (What the f-?)
I used to like you
And now I don't (we doin' good)
Ooh, I'll be broken too (too)
If you left me like (me like) like I left you
That's your problem

Not my problem, not my problem
Call it what you want, but you're not my problem
Cryin' all the time, but you're not my problem
If you got issues (that's your problem)

Not my problem, not my problem
Call it what you want, but you're not my problem
Cryin' all the time, but you're not my problem
If you got issues (that's your problem)

I thought I liked you, I thought you was cool
But I'm a thot when I be drinking, don't be thinking sh- through
Nevertheless, you got the clue, and now you blue
'Cause I ain't speaking to you
Aww, boo boo, you'll be cool

Don't boo-hoo, boo, what's the issue?
JID j-j-just listen, this bi-, this chick trippin'
I'm dippin', I'm dippin', I'm done with it
I'm stupid, I'm dumb, come with it
I heard 'em all, I'ma call you one name
(That's your problem)

Not my problem, not my problem
Call it what you want, but you're not my problem
Cryin' all the time, but you're not my problem
If you got issues (that's your problem)

Not my problem, not my problem
Call it what you want, but you're not my problem
Cryin' all the time, but you're not my problem
If you got issues (that's your problem)
