## "Sycamore"

Sycamore in the summer bearing leaves  
Swing, you're pushing our daughter underneath  
Flowers bloom in the garden  
Sway in breeze  
Just imagine a world where we could be

Right now in the waiting room, emotions running wild  
Worried 'bout my lover and I'm worried 'bout our child  
Part of me was always in denial  
It's gonna take a little while

But in our story, love in, love out

We are glorious

In our story, love in, love out

We are glorious

Sycamore bringing shade from beating sun

Nothing more than a word, a smoking gun

What a puzzle is this to be in love

To be planting your roots then dig them up

Waiting on professionals to tell you how it is

What's he gonna say after 'I think you better sit'?

Brace yourself, something's about to hit

It's gonna take a little while

But in our story, love in, love out

We are glorious

In our story, love in, love out

We are glorious

Sycamore in the field, a lonely tree

Darling what will become of you and me?
