## "You Must Burn!"

Catch a fire and burn all the misery

Foul fingers spin mob mentality

Anger on the rise as the flames grow higher

Choke on the smoke of the funeral pyre

Backfire

Killing all we've learned

History will burn

Burn it

Smile as it burns to the ground

The perfect don't want you around

Question yourself, you may learn

Who's the next witch you must burn?

You must burn!

In the name of hell, henchmen to conspire

Black figures loom as a dark desire  
Inquisition served, build your enemy  
Tied to the stake, torching heresy  
Flame out

Killing all we've learned  
History will burn  
Burn it

Smile as it burns to the ground  
The perfect don't want you around  
Question yourself, you may learn  
You are the witch you must burn  
You must burn!

In the heat of the night  
In the moon's shining light  
Feed the appetite  
In the heat of the night  
In the moon's shining light  
Feed the appetite

Smile as it burns to the ground

The perfect don't want you around

Question yourself, you may learn

You are the witch you must burn

You must burn!

You must burn!

You must burn!

You must burn!
