"Caught feelings"

Outta the blue

I didn't see it coming

Hearts in lead

X-ray burnt through

Positive test

No vaccine for emotion

Danger in red

Running veins

It feels like a revelation

invisible steps

Starting to climb

I caught Feelings

Strange kind of weather

It shines but it rains inside

was I dreaming

Better hold it all together
Buckle up and go for the ride

I dunno why feel so alive
Who put the words to my moody

Outta of the blue
Like the first day of summer
Captured me
Like a butterfly

It feels like a invitation
invisible steps
Learning to fly

I caught Feelings
Strange kind of weather
It shines but it rains inside
what's the meaning
Better hold it all together
Buckle up and go for the ride

I've never been here before

I chose to be alone now am wondering why

Don't wanna wait no more

I've stubbed along

But I've found my way out.

I've found my way out

I've found my way out

I've found my way out

I caught Feelings

Strange kind of weather

It shines but it rains inside

was I dreaming

Better hold it all together

Buckle up and go for the ride

Yerr go for a ride

I caught Feelings

Strange kind of weather

It shines but it rains inside
was I dreaming
Better hold it all together
Buckle up and go for the ride

Oh go for a ride!
I caught feelings
